China Chamber of Commerce for Import and Export of Medicines & Health Products

China Chamber of Commerce for Import and Export of Medicines & Health Products (CCCMHPIE), established in May 1989, is a national trade association and its mandate is to promote the development of

international trade in medicinal and health products. CCCMHPIE , as one of the six major Chambers of Commerce under the Ministry of Commerce of China, has a 2,000 odd membership covering almost all the leading pharmaceutical and health products manufacturers and traders in China. Since its founding, CCCMHPIE has been actively involved in trade promotion, coordinating, providing service to members and has been playing an increasingly significant role in the pharmaceutical and health products trade. The fields that CCCMHPIE covers is ranging from Traditional Chinese Medicines(TCM), pharmaceuticals, preparations, medical devices and equipments, dressings, biopharmaceuticals, nutraceuticals, functional cosmetics, to health products, etc. The philosophy of CCCMHPIE is to adopt an integrated and issue-driven approach to requests of its members and offer a seamless service in all aspects.

As a social body with more than 50 staff formed along business lines and enjoying the status of legal person, CCCMHPIE is composed of economic entities registered in the People's Republic of China under the law.

CCCMHPIE has been entrusted by the government to fulfill many a mission extended from the related government organs such as the pricing coordination, granting subsidies to localities involved in promoting pharmaceutical export, implementing tendering of medicinal products quotas, assessing the qualifications of export bases in China, etc. CCCMHPIE has also been invited to engage in the bilateral and multilateral trade negotiations at governmental level. Its excellent performance has won the strong support from the government and widespread appreciation from abroad.

China Chamber of Commerce for Import and Export of Light Industrial Products and Arts-Crafts

Founded in 1988, China Chamber of Commerce for Import and Export of Light Industrial Products and Arts-Crafts (CCCLA) is, in accordance with relevant rules and regulations, a national level organization composed of enterprises engaged in production, import and export of footwear, furniture, suitcases & bags, toys, ceramics, jewelry, and so on. The membership of CCCLA has exceeded 8000.

CCCLA has the following major functions: to be the bridge and link between enterprises and the government, and to convey enterprises' appeals and suggestions to the government; to establish and to push forward self-disciplined market systems; to maintain normal market order and fair trade; to follow the development of the industry home and abroad; to collect and to release information of the industry; to provide consulting services on law, policy, technology, management, market and so on; to hold trade fairs and exhibitions; to help enterprises to expand international market; to have economic and technological exchanges and cooperation home and abroad; to coordinate trade disputes and to organize member enterprises to respond to antidumping allegations, anti-subsidy, safeguard instruments and special safeguard instruments against Chinese commodities; and to maintain normal business order of import and export.

China Chamber of Commerce of Metals Minerals & Chemicals Importers & Exporters

(see www.cccmc.org.cn)

China Chamber of Commerce for Import & Export of textiles

The China Chamber of Commerce for Import and Export of Textiles (CCCT), established in October 1988, is the leading national trade organization representing exporters and importers of textiles and clothing in China, with a membership of more than 11,000 companies. CCCT members, involved in the business of manufacturing, exporting and importing all kinds of textile fibers, yarns, fabrics, clothing, home textiles, industrial textiles and accessories, operate in 31 provinces and municipalities throughout the country. CCCT members cover a majority of Chinese traders, manufacturers and foreign-funded businesses in the textile and clothing industry, representing more than 70% of China's import and export trade in textile and clothing.

The purpose of CCCT is to represent the interests of the industry and its members and to promote the sustainable development of China's textile and clothing trade. The core functions of CCCT can be summarized as "Coordination, Guidance, Consultation and Service". The main activities conducted by CCCT include:

- ◆Protecting the legitimate rights and interests of member companies, presenting industry opinions to the government and offering proposals and references for government policy-making;

- ◆Assisting the government to guide and regulate business activities of member enterprises in compliance with the law, and promoting self and mutual discipline within the industry with a view to curb unfair competition and maintain normal import and export trade order;

- ◆Establishing monitoring and early-warning system for sensible textile and clothing products, and organizing members in response to foreign trade barriers, such as safeguards and anti-dumping cases against Chinese textiles and clothing;

- ◆Providing members with information and consulting services on trade policies, market & industry trends, trade data and etc. through fortnightly Textile Trade Newsletter, market reports, various publications and CCCT website;

- ◆Organizing seminars, conferences, training programs and other related events on topics of interests and concerns of member companies;

- ◆Establishing dialogue mechanism with industries of other countries, and encouraging business exchanges and cooperation between member companies and their foreign counterparts by various forms of communication, such as regular/annual meetings, information sharing and business matchmaking meetings;

- ◆Sponsoring or organizing textile and clothing fairs at home and abroad, such as Interbrand in Beijing, China Clothing and Textiles Expo in Melbourne and the Textile and Clothing Exhibition Area of Canton Fair in Guangzhou, and organizing members to participate in trade fairs abroad, with a view to offer assistance to

Chinese and foreign companies in developing both international and domestic markets.

As a bridge between Chinese textile and clothing exporters and importers and their counterparts in the rest of the world, CCCT is willing to join hands and set up long-term partnerships with trade organizations across the world, in a common effort to make contributions to the prosperity of the global textile and clothing trade.

China Chamber of Commerce for Import & Export of Foodstuff and Agricultural Products

(see www.agriiffchina.com)

China Development Bank Corporation

China Development Bank Corporation ("the Bank" or "CDB") is dedicated to the mission of strengthening the competitiveness of China and improving the living standards of its people in support of the State's medium- to long-term development strategies and policies.

The Bank is especially attentive to the financially disadvantaged peoples and sectors of the nation's economy. In support of State's policies to implement disciplined development and build a harmonious society, the Bank directs funding to constrained sectors, including urbanisation, SMEs, agriculture, rural communities and farmers, along with special programs for health care and education. In answer to the call of the State to encourage domestic enterprises to "Go Global", the Bank also engages in a wide range of international cooperative activities.

Accelerating international cooperation remains a critical element of CDB's desire to be recognized as internationally benchmarked against leading commercial banks. CDB continued to support the State's "Go Global" Strategy by increasing the depth and coverage of its international business and cooperation in key markets, and improving the platforms for expanding its international syndication business and strategic projects. 2008 also witnessed the largest single-year growth in the Bank's foreign currency lending, and CDB was positioned as the largest foreign cooperation investment and financing bank among domestic banks, with a balance of foreign currency loans amounting to USD 64.5 billion at year end. This made CDB the bank with largest foreign investment and foreign lending in China. Most importantly, the number of non-performing foreign currency loans has remained at zero for 25 consecutive quarters.

The Export-Import Bank of China

As an important force in the backup system of foreign trade and economy and a significant component of the financial system, China Eximbank has developed into a key channel of policy financing for exports and imports of mechanic and electronic products, complete set of equipment, and high- and new-tech products, and for offshore construction contracts as well as overseas investment projects. The main mandate of the Bank is to implement the state policies in industry, foreign trade, diplomacy, economy and finance to provide policy financial support so as to promote the export of Chinese mechanical and electronic products and high- and new-tech products, to support Chinese companies with comparative advantages to conduct such cooperation with foreign partners as offshore construction contracts and overseas investment projects, to develop and strengthen relations with foreign countries, and to enhance Sino-foreign economic and

technological cooperation and exchanges.

Shanghai Electric Group Co., Ltd.

Shanghai Electric Group Co., Ltd. is one of the largest equipment manufacturing groups in China. In April 2005, Shanghai Electric was successfully listed in main board of the Stock Exchange of Hong Kong, and with A-share it was listed in the Shanghai Stock Exchange in December 2008. And now its total assets reaches RMB 80 billion, the number of employee reaches nearly 30 thousand and the annual output value reaches over RMB 50 billion for many years. Since being listed, the net assets, sales revenue and consolidated net profit of Shanghai Electric have been increased respectively by 1.56 times, 2.31 times and 2.03 times. The business of corporation covers power generation equipment, T& D equipment, heavy equipment, rail transportation equipment, environmental protection equipment, elevators, machine tools, printing and packaging equipment, and etc.

BYD Company Limited

Established in 1995, BYD Company Limited (BYD for short) is a high-tech enterprise listed on the Hong Kong Stock Exchange It is a top high-tech enterprise in China specializing in IT, automobile, and new energy. BYD has the largest market share for Nickel-batteries, handset Li-ion batteries, cell-phone chargers and keypads worldwide. It is the largest supplier of rechargeable batteries and has the second largest market share for cell-phone shells in the globe. BYD Auto becomes the most innovative independent national auto brand with a growth rate of over 100% for recent consecutive 5 years and leads the field of electric vehicles with unique technologies. In the field of new energy, BYD has developed green products such as Electric Vehicles, Energy Storage Stations and Solar Power Stations. It will continue to lead the new energy revolution in the world!

CNR (China North Rolling) Corporation Limited

China CNR Corporation Limited (hereinafter "CNR") was reorganized from China Northern Locomotive and Rolling Stock Industry (Group) Corporation in June 2008. Directed by the State-owned Assets Supervision and Administration Commission of the State Council, CNR is a leading provider in the field of Locomotive and Rolling Stock. Its market covers China, Australia, Asia and Africa.

CNR's business includes the design, manufacturing, refurbishment, overhaul and maintenance of electric locomotives, diesel locomotives, passenger coaches and freight wagons, electric and diesel multiple units, traction motors and rolling stock. CNR has 20 Holding Subsidiaries, all registered to ISO 9000 standards, and some have acquired certificates of ISO 14000, OHSAS 18000 and AAR. The annual ability of CNR: 460 diesel locomotives, 370 electric locomotives, 2,300 passenger coaches, 1,100 urban railway vehicles and 26,000 freight wagons.

CNR provides more than half of 500,000 locomotives and rolling stocks running on over 70,000 kilometers of Chinese railway. For more than half a century, CNR locomotives and rolling stocks have transported goods and passengers for dozens of countries and CNR products have been widely used in over 40 countries and regions worldwide. CNR foreign trade window is LORIC Import & Export Corp., Ltd.

We have a history of maintaining excellent relations with customers based on superior quality and performance. Yet, we are developing much closer relationships with customer and taking more shares in the entire supply and manufacturing field.

Our ultimate goal is to provide our customers with the best service and high-quality products at a rather competitive price. We stress partnerships with our clients and make efforts to create the example of win-win relationships in the 21st century, where everyone wins.

China National Paper-Industry Investment Corp.

China National Paper-Industry Investment Corp (formerly: China National Materials Development & Investment Corp.), was founded in 1988, and the registered capital of 1.317 billion Yuan. It is a subsidiary of The China ChengTong Holdings Group LTD. The CNPIC invested the total of more than 80 projects, in the field of metal, chemical, financial, electronics, logistics, real estate, and trade, including Shanghai Yichang Board Co., Ltd., Liaoning Fushun Ethylene Chemical Co., Ltd., Chongqing Iron and Steel (Group) Company, Shanxi Aluminum Factory, Suzhou Chong Yuan Technology Co., Ltd., Anhui Sichuang Electronics Co., Ltd. and so on, and get a good return on investment.

In 2005, The CNPIC held of shares of Foshan Huaxin Development Co., Ltd., and indirectly held its subsidiary, FOSHAN HUAXIN PACKAGING CO., LTD (200986). In June 2009, Zhuhai Hongta Renheng Paper Co., Ltd. officially became a subsidiary of FOSHAN HUAXIN PACKAGING CO.,LTD. In July 2009, the Corporation acquired Zhanjiang Guanlong Paper Co., Ltd. and came into specialty paper market. In December 2009, the Corporation successfully purchased 6,000 shares of GUANGDONG GUANHAO HIGH-TECH CO., LTD, holding 27.273% of its total share capital, and became the controlling shareholder GUANGDONG GUANHAO HIGH-TECH CO., LTD.

After several years of development, the Corporation's paper production capacity is 90 tons, and from a single coated white paper by the increase in the coated white paper, white paperboard, carbonless paper, thermal paper, sticker paper and so many varieties, and product quality is the forefront of the domestic home.

The CNPIC pursues the positive human resources policy, and has a team that understand the modern enterprise management and get professional skills. "Open, Innovation, Competition and Cooperation" is the corporate culture, and accumulation of sustainable development for the company's competitive strength.

Huawei Technologies Co., Ltd.

Huawei Technologies Co.,Ltd.("Huawei") is a leader in providing next generation telecommunications networks, and now serves 35 of the world's top 50 operators, along with over one billion users worldwide. Its products and solutions encompassing wireless products (HSDPA/WCDMA/EDGE/GPRS/GSM, CDMA2000 1xEV-DO/CDMA2000 1X, TD-SCDMA, WiMAX), core network products (IMS, Mobile Softswitch, NGN), network products(FTTx, xDSL, Optical, Routers, LAN Switch), applications and software(IN, mobile data service, BOSS), as well as terminals(UMTS/CDMA). Major products are designed based on Huawei's ASIC chipset and utilize shared platforms to provide quality and cost-effective products. At the end of June 2008, Huawei has over 87,502 employees, of whom 43% are dedicated to R&D. Huawei's global R&D centers are located in Bangalore in India, Silicon Valley and Dallas in USA, Stockholm in Sweden and Moscow in Russia in addition to those in Beijing, Shanghai, Nanjing, Shenzhen, Hangzhou and Chengdu in China.

ZTE Corporation

ZTE is a leading global provider of telecommunications equipment and network solutions. ZTE's product

range is the most complete in the world, covering virtually every sector of the wireline, wireless, terminal, and service markets. ZTE commits around 10% of its annual turnover to research and development and takes a leading role in a wide range of international bodies developing emerging telecoms standards. It is China's only listed telecoms manufacturer, with shares publicly traded on both the Hong Kong and Shenzhen Stock Exchanges. ZTE was included in BusinessWeek's 2006 ranking of China's Top 20 Brands. ZTE was also awarded the "Most Promising Vendor of the year" by Frost & Sullivan in its 2007 Asia Pacific ICT Awards. ZTE has set up 16 research and development institutes in China, USA, Sweden, India, Pakistan and France etc and ZTE now has about 50000 employees and 8,000 of them are working in about 100 representative offices around the world.

China FAW (First Automotive Works) Group

FAW Group is a global leader in the vehicle manufacturing industry with a 50-year history of innovation. Founded in 1953, FAW employs 133,000 people around the world and sells products in over 70 countries. FAW is a diversified maker of quality light, medium, and heavy-duty trucks, automobiles, municipal buses and luxury tourist coaches, custom bus chassis, and mini-vehicles with total sales in excess of 7 million vehicles worldwide. FAW maintains the lead market position within China while continuing to expand into new international markets, executing a carefully planned strategy to build a comprehensive global organization.

China FAW Group Corporation, commonly referred to as FAW due to its original name of First Automotive Works, broke ground for its first factory on July 15, 1953. Since then, FAW has been at the forefront of promoting China's automotive industry. Although FAW began life solely as a commercial truck producer, it later expanded into the light truck and car sector. In 1991, working in partnership with Volkswagen AG, FAW constructed a new state-of-the-art automobile factory with an annual production capacity in excess of 150,000 units. In 2002, Tianjin Automobile Industry (Group) Corporation was merged into FAW Group Corporation, and began joint venture production with Toyota Motor Corporation. At present, FAW's current production strategies put a heavier emphasis on the production of cars while maintaining our dominant position in the commercial truck industry.

FAW has 28 wholly owned subsidiaries and controlling interest in 18 partially owned subsidiaries. Among these are FAW Jiefang Truck Co. Ltd. and FAW Bus and Coach Co. Ltd., which are wholly owned subsidiaries; FAW Car Co. Ltd., Tianjin FAW Xiali Automobile Co. Ltd., and Changchun FAW Sihuan Automobile Co. Ltd., whose shares are traded on the stock exchange, and FAW-Volkswagen Automobile Co. Ltd. and Tianjin FAW Toyota Motor Co. Ltd., both of which are Sino-foreign joint ventures.

FAW's production bases are located in northeast China's Jilin and Heilongjiang provinces, east China's Shandong province and Tianjin municipality, south China's Hainan province, and southwest China's Sichuan and Yunnan provinces.

FAW's state-of-the-art government-certified engineering development and test center, China's largest and most extensive automotive R&D facility, is the country's leader in automobile and commercial vehicle research. It stands alone in China in possessing both cold and semi-tropical weather vehicle testing facilities. The company's total assets are valued at 109.85 billion Yuan (US \$14.27 billion).

We are dedicated to the core value that total customer satisfaction is our number one priority. As a global player with a sales volume now over one million units per year, we take advantage of the latest cutting edge technologies, production methods, and management practices to bring our customers the latest in automobile, truck, and bus design.

Beijing (Feb.7th) Railway Transportation Equipment Co.,Ltd

Founded in 1897, the Beijing February 7th Railway Transportation Equipment Co., Ltd. or "BRE" located at the southwestern suburb of Beijing, China's capital city, is a subsidiary of China CNR Corporation Limited. It is a large-scale modern enterprise with a long history.

BRE is mainly engaged in the manufacture and maintenance of diesel locomotives, high-power diesel engine units and parts and components, and the manufacture of heavy-duty railway maintenance equipment. It occupies an area of 1,043,000 square meters with over 4,000 employees, which are around 210,000 square meters building area of workshops, and more over, possesses more than 3,000 sets of mechanical power equipment of various types. BRE has annual capacity of producing 200 sets diesel locomotives, 100 sets high-power electric locomotives, 60 units of newly heavy-duty railway maintenance machinery and repairing 100 sets diesel locomotives at the same time. BRE's major products include DF7 and CK series diesel locomotives, GK1E series diesel locomotives for industry and mining, HX3 7,200 kilowatts AC-Drive locomotives, LZC-800 formation rehabilitation vehicles and GMC96 rail grinding trains and so on.

As an enterprise with strong technical strength, sophisticated equipment, well established quality assurance systems as well as sound market reputation, BRE will be honored and committed to providing consumers with superb products and satisfactory services.

The rapid globalization has the whole world calling on China. The Beijing February 7th Railway Transportation Equipment Co., Ltd., as the major supplier of railway transportation equipment manufacturer in China, is doing its best to realize its mission of "Joining the World, Drawing the Future" and pushing forward the advancement of the world railway industry.

Tangshan Railway Vehicle Co., Ltd

Located in Fengrun District, Tangshan, Hebei Province, Tangshan Railway Vehicle Co., Ltd. (hereinafter called TRC) is the "newest", the "oldest", and the "most promising" enterprise in China's railway transportation equipments manufacturing industry.

The "newest" means that TRC was just established on July 10th, 2007, and its main body was born from the manufacturing plant of new passenger cars of the former CNR Tangshan Locomotive and Rolling Stock Works.

The "oldest" means that its predecessor, CNR Tangshan Locomotive and Rolling Stock Works, was built in 1881 following the construction of China's first railway line from Tangshan — Xugezhuang during the westernization movement at the end of the Qing Dynasty. So this Works is the birthplace of China's railway

transportation equipments manufacturing industry. After the earthquake occurred in Tangshan in 1976, the Works was moved to and rebuilt in the Fengrun District, Tangshan.

TRC is the “most promising” enterprise of its kind.

The reason for this lies in the following four aspects:

Firstly, the development strategy of TRC relies on the economy both domestic and overseas, as well as conforms to the national policy of social harmonious development. TRC readjusted its technological layout, and redefined its products systems — two production lines with four product systems. The two production lines include the aluminum alloy carbody production line and the carbon steel carbody production line. The four product systems consist of the 350km/h EMU, our traditional products such as the Model 25B car, Model 25G car, Model 25K car and Model 25T car, the urban rail cars (including metrocar, LRV) and the specially purposed vehicles (including military transportation car, tilting DMU and maglev).

Secondly, TRC has created lots of first during its 127-year history. For example, in 1881, the China’s first steam locomotive named “Rocket” and the first passenger coach specially designed for Empress Dowager Cixi were born here; In 1959, the China’s first batch of high-level official cars were built by us; In 1989, the first batch of Model 25 railway passenger cars —168 units of international bidding passenger cars were manufactured here. From then on, the Model 22 railway passenger cars were completely replaced by Model 25 cars; Since 1994, batches of new-model passenger cars were developed and produced in succession for the six times speed-up campaign of Chinese railways. In 1998, China’s first double-deck DMU was developed and manufactured here. Following that, the first tilting DMU of China was completed in TRC in 2003. And the first LRV was produced in 2005. At present, TRC is concentrating on the manufacture of the 350km/h EMUs cooperated with Siemens.

Thirdly, TRC is one of the first group of the state-designated 103 innovation-oriented pilot enterprises in China, and the only one in Hebei Province. Upon the 350km/h EMU Project, our company will reach and integrate five “first-class”, namely first-class product, first-class working team, first-class technology, first-class management and first-class culture.

Fourthly, TRC has a profound innovation cultural background. One hundred-plus-year history is a history of unceasing innovation. This profound cultural background will enable us to innovate and develop more advanced products.

Effective Sales Network and After-Sales Service System

TRC has been manufacturing railway passenger cars as per the client’s preference. Local geographical and environmental conditions are duly taken into consideration during the design and manufacture stage of its products. Due to the adoption of the UIC standard, the railway passenger cars manufactured by TRC have reached the international standards. Its products have been exported to lots of countries and regions such as Southeast Asia, Central Asia, West Asia and Africa etc.

TRC has consummated its sales network and after-sales service system. In order to guarantee the operation reliability and safety of its products, TRC has always dispatched some technicians with work experiences in several fields to be engaged in the after-sales service both domestic and abroad.

CNR’s Core Ideas :

CNR’s Mission: Join the World, Drawing the Future

CNR’s Perspective: Become a world-class enterprise in the railway transportation equipments manufacturing industry

CNR’s Core Values: Credible, Creative, Active, Progressive

CNR’s Goal for Team Building: Powerful, Energetic, Cohesive

CSR (China South Rolling) NANJING PUZHEN ROLLING STOCK CO.,LTD

CSR Nanjing Puzhen Rolling Stock Co., Ltd. (hereinafter referred to as "CSR Puzhen") is a backbone enterprise in manufacturing railway equipment in China, the base of developing and manufacturing double-deck air-conditioning passenger coaches as well as the appointed enterprise of urban mass transit vehicles. CSR Puzhen was founded in 1908, and the business covers railway passenger rolling stock, urban mass transit vehicles, multiple units and railway components and fitting. CSR Puzhen actively adapts the requirement of railway equipment modernization by strongly pushing the upgrading of products. The 25 Type single and double-deck passenger coaches are the main products, the speeds of which range from 120km/h to 200km/h. Multiple units are another main product of CSR Puzhen after integration of advanced international manufacturing technologies. Successively and successfully, power centralized DMUs and power separated EMUs are developed, thus meeting the demands of various customers. Through cooperation with international enterprises, CSR Puzhen speeds up to integrate advanced international manufacturing technologies and has won orders of urban mass transit vehicles for Shanghai, Nanjing and Hangzhou. From 2006, CSR Nanjing began to get into the overseas market including South-East Asia, Africa, Eastern Europe, South America, and successively won orders of Georgia EMUs, 22 stainless steel LRVs for Hongkong, Mumbai Line One and DMUs for Malaysia.

CSR (China South Rolling) Zhuzhou Electric Locomotive Co., Ltd.

CSR Zhuzhou Electric Locomotive Co., Ltd. (Hereinafter referred to as "ZELC"), founded in 1936, is an affiliate of China South Locomotive & Rolling Stock Corporation Limited. ZELC covers an area of 3.1 Square Kilometers and has nearly ten thousand employees. ZELC is the leading enterprise in Chinese Electric Locomotive and metro manufacturing industry, and possesses more than 20 types of various AC-DC, AC drive electric locomotives and EMUs. The annual production capacity of Electric locomotive is 800 units (as reference to 6 axle locomotive). So far ZELC has supplied 7000 units of the SS (Shaoshan) Series and DJ Series Electric Locomotives to Chinese railway, occupying more than 70% of the Chinese Railway volume. The annual production capacity of mass rapid transit Vehicles is 1,000 units (800 for aluminum and 200 for stainless steel). Since 2002, ZELC has supplied more than 1500 units of advanced metro vehicles to Chinese metropolis such as Shanghai, Guangzhou, Wuhan and Shenzhen successively. In overseas

markets, ZELC has signed contracts successively with Iran, Uzbekistan, Kazakhstan, Singapore and Turkey for supplying 166 units of electric locomotives, metro engineering maintenance vehicles and mass rapid transit vehicles. As the Chinese first enterprise for exporting electric locomotives, ZELC devotes itself in upgrading the performance and the reliability of vehicles, enhancing the level of design tools and manufacturing technology, enriching test verification methods, strengthening the quality control and the organization of the transportation and services abroad and creates a good international fame. In 2008, ZELC became the enterprise in Chinese railway transport equipment sector which passed IRIS certificate.

Purpose of the visit : Export Business

SCOPE OF BUSINESS: R&D, manufacturing, repairing, sales and after-sale service of rail transportation equipments and components.

Negotiation field: electric locomotives and Mass rapid Transit Vehicles (EMU, LRV, metro, etc.)

China Railway Large Maintenance Machinery Co., Kunming

China Railway Large Maintenance Machinery Co., Kunming (Kunming KCRC) founded in 1954 and reformed in 2003, it is the member of China Railway Construction Corporation Ltd.(CRCC)

Kunming, KCRC has long-term committed to the cause of railway maintenance machinery, through technology transfer, joint and self-development, The company accumulates a number of own technologies and core technologies, has a strong capability of independent innovation. KCRC forms structural patterns of several series supporting products like cleaning, tamping, regulating and stabilizing etc. and the company becomes Chinese strongest and biggest large maintenance machinery manufacturing and repair base in researching, developing , production and sales.

During large maintenance machinery research and production, the company has cultivated a large number of excellent technical expertise. The company plays an important role in basic research, market research, product development, machine manufacturing and marketing services. And KCRC Has laid a solid foundation for "production one generation, development one generation, planning one generation" .

Large Maintenance Machinery is an important part of railway technology equipment modernization. And the company plays efficient role in raising railway quality and working performance. It is the important and indispensable equipment to ensure safety of continuous speed up and high speed railway operation. It has greatly enhanced the quality of work by using efficient large maintenance machinery for railway repair operation and is putting an end to Chinese railway history that rely on artificial railway maintenance. It promotes reformation of railway repair process and repair system. Large Maintenance Machinery has played an irreplaceable role in Chinese railway previous speed up projects and Qinghai-Tibet Railways and other new railway constructions. It makes Chinese railway maintenance machinery overall technology and

equipment level enter to world advanced level.

Large maintenance machinery is high-tech products of mechanical, electrical, hydraulic, pneumatic, laser, automation and computer technologies. In order to ensure product quality, Kunming KCRC is ongoing technological transformation and has allocated a number of internationally advanced level of manufacturing and testing equipment, it improves the means of production and testing, increased manufacturing capacity and lays a solid basis to meet customers demands.

Through the ISO9001 quality management system certification, Kunming KCRC insists quality policy of "excellence, quality-made machinery; pursuit of excellence, first-rate brand" , the company vigorously implements the project quality, strengthens inspection of raw materials, purchased parts, machining parts, the whole machine quality and its performance. The company makes large maintenance machinery products reach the goal of "high standard, high-performance, high-quality" and further meet needs of railway construction.

Kunming KCRC makes satisfaction for the customers to be highest standards, improves customers training system. The company trains about professional knowledge and basic skills like machine structure principle and operation maintenance etc. and in time resolves difficulties and problems at customers site and strives for customers to provide best products and best services to ensure that large maintenance machinery working in best performance and maximum efficiency.

Kunming KCRC advocates enterprise core values "integrity, innovation and timeless, quality and character together". The company makes innovation for fundamental driving force in order to promote enterprise development and makes good faith for the wisdom to win the world. All employees based on their respective posts and display their talents and embodies their values. The company let results as a new starting point, and never satisfied with present situation and continue to improve each work and make greater contributions for realization of enterprise development and social progress .

Kunming, KCRC products technology is difficult, systems integration is strong, and many times won National key technological equipment Achievement Award, National New Product Award and National Scientific and Technological Progress Award. In 2006, the company won Chinese standard Innovation and contributions Award and Chinese famous brand products. In 2007, the company won National Scientific and Technological Progress second prize and the State Torch Program Important high-tech enterprises and national Quality Advanced Work Units.

Kunming KCRC will continue to carry forward enterprise spirit "not fear hardships and dangers, Climb high peak bravely, leading in railway maintenance industry, create reputation in and abroad. With the goal of "grasp world class technology, produce world-class products, build world-class base".

In accordance with general requirements "transfer of advanced technology, joint design production , build Chinese brand ". Kunming KCRC combines original innovation, integrated innovation and technical transfer absorption. The company enhances capability of independent innovation of enterprises and the core competence. It makes Kunming KCRC China First, the world's leading international competitive of railway maintenance machinery well-known brand, and promotes cause of large maintenance machinery to go forward, and makes contribution to railway equipment modernization equipment.

TBEA Co., Ltd.

TBEA Co., Ltd. (hereinafter referred to as: TBEA; Stock Code: 600089) is one of the core enterprises of China's major equipment manufacturing industry, one of general contracting enterprises of complete power

project of the world, state-level high-tech enterprise, China's largest transformer product development base, and also China's important R&D, manufacturing and export base for wire and cable, new high-voltage electronic aluminum foil materials as well as solar photovoltaic products and systems. The annual production capacity of transformer is 170 million kVA, ranking the Top 3 in the world and the First in Asia. The company has built 9 modern industrial parks, and also has established permanent overseas offices in 23 countries and regions, such as the United States, Russia, etc. The three major industries, power transmission, new energy and new materials, all have "National Engineering Laboratory", and the pattern "taking power transmission industry as the leading, new materials industry as the mainstay and new energy industry as highlight" with coordinated development of the three major industries is initially constructed. As of the end of 2009, the company's total assets reach nearly RMB20 billion with sales of RMB17 billion, and total number of employees is 13,000.

The company is awarded the ISO9001, ISO9002, ISO14001, OHSAS18000, British Royal UKAS, the United States FMRC, the international IEC quality, environment, health, safety and other international management system certification, and establishes a sales and service network radiating more than 60 countries and regions, including the United States, Japan, the European Union, Russia, ASEAN, SCO, Africa, the Gulf and so on. At present, the company has nearly 600 of all kinds of independent intellectual properties, core patented technologies and domestic and international proprietary technologies, including nearly 100 of invention patents, and has participated in the establishment of more than 100 domestic and international standards. 1000kV UHV AC & DC products standard has been adopted by IEC and became the international standard in this field.

TBEA has always been focused on the research and collaborative development of the three areas of "transmission, new energy and new materials", build the world's trusted service provider, work tirelessly to contribute for global energy industry and human civilization progress.

Galanz Group

Positioned as "Splendid Cooperation, Global Brand", Galanz is a famous group with world-leading microwave oven, air-conditioner, washing machine, refrigerator and small home appliance R&D and manufacturing center both in Shunde and Zhongshan, Guangdong province. It has 14 subsidiary companies in the headquarters, 60 sales branches in China and several branch offices in Hong Kong, Seoul and North America.

Through worldwide commercial contact with more than 100 countries and regions, in the past year 2009 the total output value of Galanz enterprises group reached 25 billion RMB. Now, 30,000 employees of Galanz are trying to promote the globalization development of our microwave oven, air-conditioner, small home-appliance and related supporting industries.

In recent years, Galanz has won a lot honors from the governmental departments and institutions such as "Chinese Famous Brand", "National Free-inspection Product", "the Star Exporter of Home Appliance", "the top 100 Strong Enterprises of Great Vitality", "Top 500 Corporations in China", "Top 500 Informationize Enterprises in China", "Chinese Top Ten Famous Brand of Good Quality", etc. In addition, the continuous rapid development in the past 30 years since the establishment of Galanz is attached a great attention of many economists, researchers, and the media circle. They called it "the Galanz phenomenon" and "the Galanz Miracle".

Galanz always insist on the idea "Greatness Lies on Innovation", and the managerial principle "Trying Our Best to Move the Customers". Now, it's going forward to be a world famous brand and a world-leading corporation.

Daqing Oilfield Services

Daqing Oilfield Area Service Department (abbreviated as "DOASD").The primary service Involved in Heating and estate Management, property and public service, health and medical community, public utilities, in the area of Daqing oilfield.It is a professional heating services center, which bends herself to Landscaping , medical care, public traffic secondary, cultural service community and social security etc. DOASD is the top-ranking heating enterprise, the largest mining service unit in china which has 37018 employees. The total heating area is 2570 million square meters, the property services area are 2400 million square meters and the total amount of heating is 19,000,000GJ, for which the thermal heating is produced by thermal power plant is 1665 million square meters. DOASD has 9 large coal-fired boilers , 175 thermal station and 202 Sewage treatment plant, most of this are automatic remote monitored. Advanced combustion management technology and management experience are used by DOASD, such as Economy Heating and desulfurization. DOASD has advanced experience in the area of improvement of the energy efficiency and decreased carbon dioxide emissions and dust pollution.heat scale and technical level are forefront in heating industry of nationwide. DOASD has 22 national patents, such as optimization central heating system, in which, heating technology combined with two heat sources, large coal-fired boiler DCS control technology and some others scientific and technological achievements are obtained awards of the province scale.

Songyuan Honghe Natural Gas Co., Ltd

Songyuan Honghe Natural Gas Co., Ltd is a high-tech cooperative enterprise which was established and registered on March 22, 2007.

Our cooperation partner and technology licensor, UniBio A/S from Odense Denmark, has obtained the right to use process patent No PA 199900690. The production process is aerobic with natural gas as the carbon and energy source to produce single cell protein. Industrial pure oxygen is used for an oxygenation fermentation process, and ammonia is used as the nitrogen source.

The patent is approved in the US, Mexico, Canada and Europe. This patent is the first and unique technology to use natural gas as a substitute resource of soybeans and fish meal for producing single cell protein. It has won the golden award of the Nordic Exposition.

RenQiu YongJi photoelectronics solar Co.,Ltd

YongJi photoelectronics solar Co.,Ltd was built in 2001. The first project is starting. This project has four hundred chinese acre and invest 20 hundred million. Output will be 200MW. The Value of it will be 21 hundred million. The main export is CIGS hull cell. The second project invest 100 hundred million and the output will be 600MW. It is be prepared to build. The company plan to reach 1000MW for the output in five years. It has 63 Talented persons of science and technology and 38 university professors.

At the same time, the company sincerely cooperate with MIASOLE of america, Hainiu company, centrotherm company and have a long technical cooperation with Nankai university. What's more, we built a 10576.89 square meters mansion of science and technology. It reaches the advanced level of internationality.

YongJi photoelectronics solar Co.,Ltd keeps its persistent development and market competitiveness depending on good facilities and technical team. The company had reached the cooperation agreement with

civil photoelectronics product manufactures ,mine,oil,chemical engineering and military units. The market prospect will be wide.

Yongji photoelectronics solar Co.,Ltd will be actively supported by the government at all levels and friends from all works of life. So it will innovate constantly and make a great effort to develop the new clean energy and struggle practically.

JVJ (GUANGZHOU) ELECTRONICS CO. LTD

JVJ (GUANGZHOU) ELECTRONICS CO.,LTD was established in June 2002. We are the largest LED R&D, production and export base in Guangdong. The company has many factories and R & D Test Center in China. The main products range to high quality LED outdoor lighting, indoor lighting and car audio-visual products based high-tech enterprises. There has constant temperature and humidity clean room, fully automated production equipment, a large number of sophisticated mechanical and electrical reliability testing and optical testing equipment, perfect quality management system, skilled staff and high-quality corporate management. Cooperate with South China University of Technology, Jinan University, Sun Yat-Sen University and the Guangdong Research Institute of Optics-Mechanics-Electricity Technology. It has set a rule model for Promotion of Cooperation among Industries, universities and Research Institutes. Adhere to the technical cooperation and the principle of combining innovation, developed a series of high-tech products with independent intellectual property rights. Overall products passed CE, UL, FCC, RoHs, EMC testing and certification, etc.. We focus the domestic and international high-end market, and accumulated a large number of foreign clients resources, such as American companies AVAGO, Wal-Mart and German companies OSRAM, etc. Rapid growth in our financial and profit. In recent years, we took over a number of provinces and municipalities project in the major scientific and Technological R&D. Also we achieved " Export Brand of Guangdong Province", "AAA grade credit enterprise import and export", "National High Efficiency Green Lighting Products" and so on.
